

TEST Creating New Persona From Home Page

Test Case ID: Persona-002 **Title:** Verify creating a new persona from the home page completes successfully.

Feature: Home Page / Persona Creation **Type:** Functional, Smoke **Priority:** High **Status:** Fail

Created By: Demirhan Yalcin **Date:** 22/03/2026 **Environment:** Chrome 122, Windows 10, Desktop

Preconditions

User is logged in with an active account that has permissions to create personas in the workspace.

Steps

1. Navigate to home page.
2. Click "Create personas" button located under "Welcome, Name!" text.
3. Click "Create a customer" button located in the middle of the screen.
4. Observe the result and any error messages appearing on screen.

Expected Result

User is able to successfully create a new persona from the home page. The persona is created and saved correctly, identical to the flow available through Building Blocks -> Personas -> New Persona.

Actual Result

An error message appears on screen saying "There was an error while saving this persona." The persona is not created. API call fails due to an issue with the organizationSlug field.

Notes

Related bug report: Persona-002, Creating new persona from home page is not possible. Also verify persona creation still works correctly through **Building Blocks -> Personas -> New Persona** as a comparison flow.
